Since 1977, John Micsak has worked with thousands of at-risk youth primarily in residential and community based settings as well as professionals worldwide serving vulnerable youth with traumatic and delinquent histories. Selected **2009 Consultant of the Year** by the National Institute for Trauma and Loss with Children, John is the founder and clinical director of the National Institute for Resiliency & Wellness. His brain based and wellness approach creates relational healing and sensory adaptable environments for challenging children. As a passionate clinician and front liner with at-risk youth offering over 40 accredited subjects that synthesize research from cutting edge resiliency work, trauma informed care and body/mind science, John is a liaison and consultant to schools, families, mental health and legal professionals.

What people are saying about John...

“In my twenty five years of clinical continuing education, this workshop was the most relevant, meaningful and well balanced presentation I have participated in. John's presentation of *Healing the Inside Child* is a “medium rare approach” to wellness approaches and therapy for children and youth.”

David Lyke, Chief Operating Officer
Albany Park Community Center, Chicago, IL

“This is one of the best trainings I have ever attended because the information was research based, evidence based and current. Not only was it fun, but it was enlightening, refreshing and reassuring. Additionally, the information was presented from heart to heart. We felt it in our souls!”

Yvette Orr, School Social Worker
Grand Rapids Public School District, Grand Rapids, MI

“John has outstanding hands-on experience with the most troubled youth. He provides one example after another. I took 15 pages of notes and strategies. I've never been to a training like this before. The workshop itself was a sensory experience.”

Dr. Karen Stubenbort,
University of Pittsburg
